What is the IDREEM project?

IDREEM (Increasing Industrial Resource Efficiency in European Mariculture) is a European research project launched in 2012 to protect the long-term sustainability of European aquaculture by developing and demonstrating a new innovative production technology, Integrated Multi-Trophic Aquaculture or IMTA.

[Read more >](#)

What is IMTA?

IMTA, to the uninitiated, is a technique in aquaculture based on the concept that growing species at multiple trophic levels side-by-side is more efficient than a monoculture system. The classic exemplar of integrated multi-trophic aquaculture (IMTA) is the fin-fish, bivalve,...
